

DAPRO

12-Strand
Polyolefin / Polyester

White

Dapro is a 12-strand construction with each strand utilizing lightweight polyolefin fiber sheathed in high tenacity polyester fibers. This unique construction produces a strong, lightweight rope that is firm/round, torque-free, and has excellent abrasion and snag resistance. Dapro is ideally suited for lifting and handline applications.

Applications

- Hand lines
- Lifting lines
- Lowering lines

Diameter		Weight		min. Breaking Strength	avg. Breaking Strength
[mm]	[inch]	[g/m]	[lbs/100']		
6	1/4	25.3	1.7	2,000	2,500
8	5/16	37.2	2.5	3,300	4,150
9	3/8	46.1	3.1	4,000	5,060
