

NYLON DOUBLE BRAID

Core
Braided Nylon

Cover
Nylon

White

Black

Nylon Double Braid has the most elastic double braid construction. It has excellent energy absorption properties and minimal strength loss due to UV. It conforms to military specification Mil-R-24050 B&C. With twice as much stretch as polyester, Nylon Double Braid is great for docking and mooring lines because of its ability to absorb energy.

Applications

- Dock lines
- Anchor lines
- Hand lines
- Pulling lines
- Slings

Diameter		Circumference		Weight		min. Breaking Strength	avg. Breaking Strength
